

## Features:

**StoreGet** is a solid state digital cinematography and HDTV recorder. It captures and plays out high definition SMPTE digital formats used in digital filmmaking.

**StoreGet** includes :

**A recorder**, fixed on/near the camera with links (HDSDI-in/out). Auxiliary data are recorded as well. Start-Stop command are **automatically** extracted in the HDSDI stream. The short power-on delay allows **StoreGet** to be used **immediately**.

**An hot plug cartridge** including a large **non volatile** memory buffer of 80 GB, allowing StoreGet to record 8 or 16 minutes with HDTV stream.

**A player** used to interface the cartridge with Post-production. The rushes download **in real time** onto a standard cut and edit tools (HDSDI link).

Compact, rugged, mobile, StoreGet's unique design allows complete freedom of motion when recording with **difficult situations**.

**StoreGet** records all popular high definition formats, including those used by the HDTV and digital cinema cameras. Thanks to its configurable H/W design, StoreGet packaging can be optimised according each model of camera.
